

LOGAN MONTGOMERY

lmontgomery23@mail.wou.edu

Profile

Dedicated Computer Science student with hands-on experience in full-stack development, AI/LLM integration, and technical support. Skilled in building web applications and working with modern development tools. Seeking opportunities to apply and expand technical skills in a professional environment.

Education

Western Oregon University, Monmouth, OR

Bachelor of Science in Computer Science, June 2026 (Expected)

- GPA: 3.51
- Relevant Coursework: C++ and Python Programming, Digital Media Production (independent study)

Experience

University Computing Solutions (UCS), Western Oregon University, Monmouth, OR

Student Programmer June 2025 – Present

- Participated in committee making decisions about institutional implementation of Ellucian Experience.
- Created technical documentation for Ellucian Experience platform.
- Built usage analytics report using Google Analytics to track app engagement.

Tech Support March 2025 – June 2025

- Installed operating systems and configured computers for campus deployment.
- Troubleshoot technical issues with electronics and provided user support.

Family Real Estate Business, Salem, OR

Marketing & Operations Assistant 2015 – 2024

- Managed website content and designed marketing materials including fliers and email communications.
- Conducted market analysis for potential property acquisitions.

Projects

Interactive Narrative AI System | Python, FastAPI, LangChain, ChromaDB

Personal Project – 2025

- Built full-stack AI narrative engine using multi-agent orchestration with LangChain and LangGraph.
- Implemented RAG system with ChromaDB for retrieval from 1,000+ markdown documents.
- Developed FastAPI backend with SQLite persistence, session management, and wiki CRUD operations.
- Integrated pluggable LLM architecture supporting both local inference (LM Studio) and cloud APIs (OpenAI, Anthropic).

Streaming Shows Database Web Application | ASP.NET Core MVC, C#, SQL Server

Academic Project – Fall 2025

- Developed full-stack web application with ~10,000 movie/TV show records using Entity Framework Core.
- Built RESTful API with async endpoints and AJAX search using Fetch API for real-time data retrieval.
- Implemented repository pattern with LINQ queries, dependency injection, and DTOs.

Additional

- Programming Languages: Python, C++, C#, JavaScript
- Tools/Environments: VS Code, Git, FastAPI, ASP.NET Core, SQL Server, SQLite, ChromaDB, LangChain
